EDUCATION

Queen's University – School of Computing, Kingston, Ontario
Bachelor of Computing (Hons.) – Specialization in Software Design

April 2025

EXPERIENCE

Bruce Power

(May 2023 – August 2024)

Full Stack Developer & Supplier Performance Analyst | Tiverton, Ontario
(Earned a performance-based extension at midterm review)

- **Saved 16+ analyst hours per monthly cycle and cut report turnaround from three business days to one** by eliminating manual consolidation with a PHP/JavaScript/MySQL supplier KPI application.
- **Established reliable KPI tracking for 42 Tier 1/2 suppliers** and reduced data defects after implementing schema validation, null/duplicate removal, audit logs, and cron-scheduled report generation.
- **Led monthly supplier review meetings with key stakeholders**; presented KPI scorecards, surfaced schedule/cost risks, and aligned stakeholders on actions to accelerate delivery and mitigate issues.
- Shipped features end-to-end in a three-person team, owned requirements, implementation, testing, deployment, and production support.

HYNK Group

(July 2014 – September 2021)

Computer Technician & Business Operations Associate | Sault Ste. Marie, Ontario

- **Reduced administrative workload by ~45%**; Designed a relational SQL database and Python automations for check-in/data entry. Data has since become consistent as a result of the new systems.
- Supported project planning and improved customer-service SOPs that streamlined day-to-day operations.

PROJECTS

CullPix (Desktop Application) | C++17, Qt 6, CMake

(August 2025 – Present)

- Built a performance-oriented desktop app for fast photo triage with multiple-format support. Shipped a Windows 64-bit portable release in September 2025.
- Implemented asynchronous thumbnail loading, a sliding-window image cache, and a priority queue to keep navigation responsive under heavy I/O.

DevOps Guard | .NET 8, C#, HTML, SQL, Docker

(September 2025 – Present)

- Built a compact dashboard tracking work items and risk/SLA KPIs. Dockerized with GitHub Actions CI.
- Implemented a .NET 8/C# API with SQL (EF Core), CRUD with filters, metrics history & daily snapshots.

Self-Hosted Server (Personal DevOps) | Linux, Docker, Bash, Python, SQL, CUDA

(September 2018 – Present)

- Deployed a Docker-based homelab (personal cloud, media, file organization, SQL) on Linux. Provisioned Windows/Ubuntu/macOS VMs, set up GPU/CUDA for ML experiments.
- Set up reverse proxy (Nginx), TLS, and automatic backups.

Data Analytics Projects | MATLAB

(January 2022 – December 2022)

- Thoroughly reported on 10+ data analysis projects using advanced techniques (polynomial regression, neural networks, PCA/LDA, supervised ML), rigorously evaluating model performance (AUC-ROC, confusion matrices).

Personal Website & Blog | Astro, TypeScript, Tailwind, HTML

(June 2025 – Present)

- Shipped a content-driven portfolio with a tag-indexed blog and lightweight UI.

LEADERSHIP

Queen Elizabeth Public School | FIRST Robotics Mentor | Sault Ste. Marie, ON

(November 2016 – January 2019)

- **Mentored and taught 20+ students in robotics programming and fundamentals**, fostering a collaborative and inclusive team environment.
- Guided teams through iterative design and debugging processes, resulting in several competition accolades and significant growth in students' problem-solving skills.

CORE SKILLS

Languages: Python, C++, C#, Java, JavaScript/TypeScript, SQL, PHP, Bash, MATLAB

Frameworks: .NET 8, Qt 6, React, Next.js, Flask, Astro

Data & Systems: MySQL, Power BI, Linux, Docker, Git, Nginx, CUDA

Practices: REST APIs, CI/CD (GitHub Actions), Unit testing, Agile/Scrum, Stakeholder communications, KPI Reporting
